

## York House Centre is Flushed With Success!

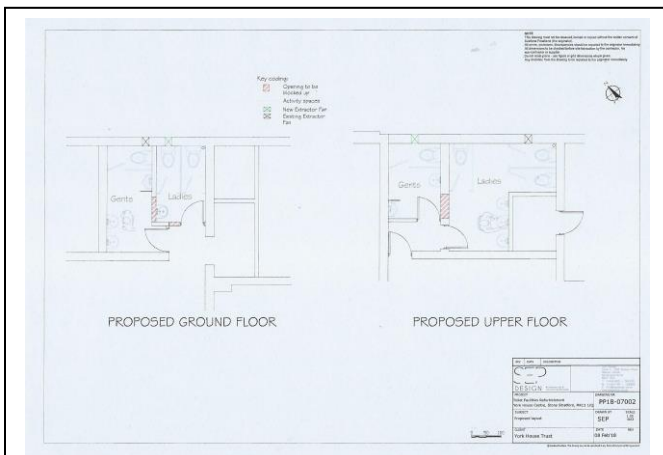

Existing Ladies Toilets

Building work is well underway at York House Centre to redevelop all the toilets in the main building. Funding has been secured via grants from WREN (landfill tax) and The Bernard Sunley Charitable Foundation plus generous donations from Mercedes Benz Financial Services and Daimler Insurance. Following a tendering process, our chosen contractors, local construction firm CJ Bricknall & Co Ltd of Kiln Farm, started work in January and are making excellent progress.

York House has gone from strength to strength over the past decade with several phases of major building work providing extra activity space, a new kitchen and storage rooms. The building is now a busy hub for all kinds of community activities but our toilets are letting us down...

Clever design work by Svetlana at SEP Design has allowed us to provide separate men's and women's facilities on both the ground floor and the middle floor, all within the envelope of the existing toilets. Women in particular will be delighted to hear that we are banishing the pink and more than doubling the number of ladies' cubicles available to provide 5!

Plans for New Toilets on Ground & Middle Floors

**Please join us to celebrate the official opening of the redeveloped York House Centre Toilets**

**Saturday 27 April 2019  
@ 10.30am**

**by Mayor of Milton Keynes
